

Advanced Tool & Supply Flushing & Testing Unit

- ❖ 2-Double Head Double Acting positive displacement pumps
- ❖ Flow rate up to (11gpm)
- ❖ Pressure testing capabilities up to 17500 psi
- ❖ Pressure testing up to 4 different lines without manifold with ability to bleed or hold pressure on all lines separately

Advanced Tool & Supply's(ATS) Flushing and Testing Units are suitable for hydraulic pressure testing, fluid circulation, filtration, and chemical injection. ATS's smaller unit saves on deck space when working offshore side by side with the subsea company. ATS's technicians are certified in NAS 1638 & 4059E and carry up-to-date certificates.
