

# Advanced Tool & Supply Surface Test Tree(STT)

- ❖ 750 ton axil load capacity at 15M working pressure.
- ❖ 750 ton 15M working pressure load bearing swivel
- ❖ Calculated to API 6A
- ❖ Pull test and pressure test preformed by 3rd party to verify 6A calculations
- ❖ Shortest OAL known in the industry (less connections and less leak paths)
- ❖ Light weight for easy pick up

Advanced Tool & Supply's (ATS) STT interfaces with the landing string while rigged up during well completions and intervention operations. ATS's Surface Test Tree side outlets can be fully dressed with kill and production valves or dressed as needed per operator's request.
